**Explanation on the Appropriate Use of Future Earnings Projections and Other Special Instructions**

This document contains “forward-looking statements” that are based on Advantest's current expectations, estimates and projections. These forward-looking statements are subject to known and unknown risks, uncertainties and other factors that may cause Advantest's actual results, levels of activities, performance or achievements to be materially different from those expressed or implied by such forward-looking statements. These factors include: (i) changes in demand for the products and services produced and offered by Advantest's customers, including semiconductors, communications services and electronic goods; (ii) circumstances relating to Advantest's investment in technology, including its ability to timely develop products that meet the changing needs of semiconductor manufacturers, communications network equipment and components makers and service providers; (iii) significant changes in the competitive environment in the major markets where Advantest purchases materials, components and supplies for the production of its products or where its products are produced, distributed or sold; and (iv) changes in economic conditions, currency exchange rates or political stability in the major markets where Advantest procures materials, components and supplies for the production of its principal products or where its products are produced, distributed or sold. A discussion of these and other factors which may affect Advantest's actual results, levels of activity, performance or achievements is contained in the "Operating and Financial Review", "Key Information - Risk Factors" and "Information on the Company" sections and elsewhere in Advantest's annual report on Form 20-F, which is on file with the United States Securities and Exchange Commission.

## 1. Business Results

### (1) Analysis of Business Results

#### 1) Consolidated Financial Results of FY2011 (April 1, 2011 through March 31, 2012)

(in billion yen)

	FY2010	FY2011	As compared to the previous fiscal year Increase (decrease)
Orders received	109.0	126.2	15.8%
Net sales	99.6	141.0	41.6%
Operating income	6.1	0.8	(86.3%)
Income (loss) before income taxes and equity in earnings (loss) of affiliated company	5.6	(3.4)	—
Net income (loss)	3.2	(2.2)	—

The pace of economic recovery worldwide slowed in FY2011, held back by the worsening sovereign debt crisis in parts of Europe and by America's housing and employment problems, but the global economy maintained a gradually improving trend, supported by emerging countries, whose growth rates have remained high.

Semiconductor-related markets also registered lower growth than expected at the beginning of the period. Many chipmakers moved to trim production in the summer of 2011, when lethargic demand of PCs and LCD televisions, the twin pillars of semiconductor consumption, fell even further.

As a result semiconductor test equipment sales declined for the period. Although customer interest in test equipment for non-memory semiconductors, used in smartphones and tablet PCs, was brisk, dramatic price declines in DRAM semiconductors for PCs, beginning in the summer of 2011, curtailed capital investment in memory testers.

Advantest consequently devoted its greatest efforts to expand sales of test equipment for application processors, CMOS image sensors, and other non-memory semiconductor sectors. After completion of the acquisition of Verigy Ltd. on July 2011, Advantest tried to gain additional market share by reinforcing its sales promotions to US and European customers and launching products in the communications semiconductor market. These efforts enabled Advantest to achieve a higher share of the semiconductor test equipment market in 2011.

As a result, both orders received and net sales showed significant year-on-year growth, with orders totaling (Y)126.2 billion (a 15.8% increase in comparison to FY2010), and net sales of (Y)141.0 billion (a 41.6% increase in comparison to FY2010). However, cumulative costs associated with the Verigy acquisition, which totaled (Y) 8.3 billion in FY2011 combined with impairment losses on investment securities and bad debt expenses of (Y) 2.6 billion led to a year-on-year decline in earnings. The company posted an operating income of (Y) 0.8 billion (a 86.3% decrease in comparison to FY2010), loss before income taxes and equity in earnings of affiliated company of (Y) 3.4 billion, and a net loss of (Y) 2.2 billion. In FY2011, the percentage of net sales to overseas customers was 88.6%, compared to 77.5% in FY2010.

Conditions of business by segment are described below. Note that the operating income of each business division is influenced by costs related to the integration of Verigy.

<Semiconductor and Component Test System Segment>

(in billion yen)

	FY2010	FY2011	As compared to the previous fiscal year Increase (decrease)
Orders received	76.5	97.0	26.8%
Net sales	69.3	105.6	52.3%
Operating income	9.9	9.8	(0.1%)

The Semiconductor and Component Test System segment was supported by aggressive capital investment by major chipmakers.

In the non-memory test system, sales expanded significantly, due to the Verigy acquisition and a number of large orders for microprocessor (MPU) test equipment. Test systems for non-memory semiconductors such as application processors used in tablet PCs and smartphones also posted solid growth.

Memory test systems, however, continued to fare poorly, despite active capital investment by DRAM makers in spring and early summer 2011, as weaker PC demand in the second half of the year forced manufacturers to freeze their DRAM capex programs.

As a result of the above, orders received were (Y) 97.0 billion (a 26.8% increase in comparison to FY2010), net sales were (Y) 105.6 billion (a 52.3% increase in comparison to FY2010), and operating income was (Y) 9.8 billion (a 0.1% decrease in comparison to FY2010).

<Mechatronics System Segment>

(in billion yen)

	FY2010	FY2011	As compared to the previous fiscal year Increase (decrease)
Orders received	20.8	16.6	(19.8%)
Net sales	18.5	20.6	11.3%
Operating loss	(0.3)	(1.3)	—

In the Mechatronics System segment, a greater numbers of unit of the Multi Vision Metrology Scanning Electron Microscope measurement system for photomasks were sold, benefiting from semiconductor process dropped significantly that create demand for more advanced technology. Conversely, sales of test handlers shrank, reflecting production adjustments, principally in the DRAM sector, from the second quarter onwards.

As a result of the above, orders input received was (Y) 16.6 billion (a 19.8% decrease in comparison to FY2010), net sales were (Y) 20.6 billion (a 11.3% increase in comparison to FY2010) and operating loss was (Y) 1.3 billion.

## &lt;Services, Support and Others Segment&gt;

(in billion yen)

	FY2010	FY2011	As compared to the previous fiscal year Increase (decrease)
Orders received	14.0	17.8	27.0%
Net sales	14.2	18.8	32.8%
Operating income	2.1	1.6	(24.3%)

In the Services, Support and Others segment, orders and revenues expanded as a result of overall increased sales of test systems, as well as benefits from consolidating the Verigy services division into Advantest's.

As a result, orders received was (Y) 17.8 billion (a 27.0% increase in comparison to FY2010), net sales were (Y) 18.8 billion (a 32.8% increase in comparison to FY2010) and operating income was (Y) 1.6 billion (a 24.3% decrease in comparison to FY2010).

## 2) Prospects for the Upcoming Fiscal Year

On April 1<sup>st</sup> 2012, Advantest reinforced its overseas business development push and its synergistic benefits from the Verigy acquisition by finalizing the integration of Verigy, which had previously been a fully-owned subsidiary, into Advantest Corporation. The company also completed a reorganization of its overseas subsidiaries—renewing the Advantest Group as a single entity including the former Verigy. Underlining its commitment to generating future innovation, Advantest has launched a new corporate initiative starting in FY2012: “ACT2014.” The acronym ACT — Advantest Culture Transformation — designates total integration of Verigy businesses and personnel and fusion of the two corporate cultures as an ongoing top priority. By FY2014, Advantest aims to achieve three discrete goals under ACT2014: “Revenues of (Y) 250.0 billion”, “Over 20.0% operating margin”, and “Over 50.0% total market share of semiconductor test systems and test handlers”.

In the semiconductor test equipment sector, the company will innovate on all fronts, exploiting synergies from the Verigy integration. Operations are expected to expand through the development of groundbreaking products incorporating technology from both companies, new service offerings with greater added value, products utilizing cloud-computing technology, the adoption of flexible manufacturing processes, global marketing activities, and the further globalization of Advantest's corporate organization, helping the company to respond to the needs of the world's chipmakers with precisely targeted solutions.

As a further measure to reinforce Advantest's potential for sustainable growth, the company intends to aggressively expand beyond the semiconductor test equipment sector. Advantest will seek to grow sales of its scanning electron microscopes, electron-beam lithography tools, RF measurement instruments, MEMS relays, terahertz imaging systems, and other products targeting non-semiconductor markets where the company's core competence — measuring technology expertise — can contribute to the development of trailblazing solutions that uphold and reinvent Advantest's mission to support leading edge technology.

In FY2012, the first year of Advantest's three-year corporate initiative “ACT2014”, continued strong growth in the smartphone and tablet PC markets is anticipated to define demand for the semiconductors used in these devices as a key driver of the company's revenue and earnings growth. Moving ahead towards the midterm milestone goals of ACT2014, the company intends to ramp up its presence in new markets among other measures to reinforce its platform for extended growth. For the fiscal year of 2012, Advantest forecasts net sales of (Y) 150.0 billion ~ (Y) 170.0 billion and operating income of (Y) 12.0 billion ~ (Y) 20.0 billion.

## (2) Analysis of Financial Condition

Total assets at the end of FY2011 was (Y) 219.2 billion, an increase of (Y) 38.9 billion compared to the previous fiscal year, primarily due to the Verigy acquisition as evidenced by an increase of (Y) 35.9 billion and (Y) 14.9 billion in goodwill and intangible assets, respectively, and a decrease of (Y) 12.7 billion in short-term investments. Likewise, the amount of total liabilities was (Y) 87.7 billion, an increase of (Y) 45.5 billion compared to the previous fiscal year, primarily due to an increase of (Y) 25.0 billion in short term debt, an increase of (Y) 9.4 billion in accrued pension and severance costs and an increase of (Y) 4.7 billion in accrued expenses, respectively. Stockholders' equity was (Y) 131.6 billion. Equity to assets ratio was 60.0%, a decrease of 16.6 percentage points compared to the previous fiscal year.

## (Cash Flow Condition)

Cash and cash equivalents held at the end of FY2011 were (Y) 58.2 billion, a decrease of (Y) 17.1 billion from the previous fiscal year.

Significant cash flows during this fiscal year and their causes are described below.

Net cash provided by operating activities was (Y) 12.3 billion (Net cash outflow (Y) 0.7 billion in FY2010). This amount was primarily attributable to a decrease of (Y) 4.6 billion in inventories and an adjustment of noncash items such as depreciation and amortization, despite the net loss being (Y) 2.2 billion.

Net cash used in investing activities was (Y) 37.7 billion (Net cash outflow (Y) 5.8 billion in FY2010). This amount was primarily attributable to payments for the acquisition of Verigy in the amount of (Y) 57.1 billion, a decrease of (Y) 14.4 billion in short-term investments and proceeds from sale of available-for-sale securities in the amount of (Y) 10.7 billion.

Net cash provided by financing activities was (Y) 9.9 billion (Net cash outflow (Y) 12.0 billion in FY2010). This amount was primarily attributable to a net increase of (Y) 25.5 billion in short term debt, redemption of senior convertible notes of acquired subsidiary in the amount of (Y) 13.8 billion and dividends paid in the amount of (Y) 1.7 billion.

The following table illustrates the historical movements of certain cash flow indexes:

	FY2007	FY2008	FY2009	FY2010	FY2011
Stockholders' equity ratio (%)	85.1	81.0	79.6	76.6	60.0
Stockholders' equity ratio based on market prices (%)	154.7	129.2	221.5	144.0	103.1
Debt to annual cash flow ratio (%)	0.0	0.2	-	-	203.2
Interest coverage ratio (times)	1,839.4	195.9	-	-	80.6

Stockholders' equity ratio: stockholders' equity / total assets

Stockholders' equity ratio based on market prices: market capitalization / total assets

Debt to annual cash flow ratio: interest-bearing liabilities / operating cash flows

Interest coverage ratio: operating cash flows / interest payments

(Notes) 1. These indexes are calculated using U.S. GAAP figures.

2. Market capitalization is calculated based on issued and outstanding shares excluding treasury stock.

3. Operating cash flows are the cash flows provided by operating activities on the consolidated statements of cash flows.

4. Interest-bearing liabilities include all liabilities on the consolidated balance sheets that incur interest.

### (3) Basic Policy on Distribution of Profits and Distribution for FY2011 and Distribution Forecast for FY2012

Based on the premise that long-term and continued growth in corporate value is fundamental to the creation of shareholder value, Advantest deems the consistent distribution of profits to be the most important management priority. Accordingly, Advantest engages in active distribution of profits based on consolidated business performance.

With respect to the distribution of retained earnings, Advantest makes payout decisions after taking into consideration consolidated business performance, financial conditions, as well as the need for strategic investment for mid-to-long-term business development. While aiming to make consistent distributions, because of the fluctuation of the market in which it operates, Advantest makes dividend payouts following a target payout ratio of 20% or more.

Retained earnings are devoted to research and development, streamlining efforts, overseas expansion, investments in new businesses and resources for M&A activities, with an aim to strengthen Advantest's business position and enhance its corporate value.

In order to maintain capital strategies responsive to changes in the operating environment, Advantest plans to repurchase its own shares from time to time through taking into account factors such as trends in stock price, capital efficiency and cash flow.

In this fiscal year, Advantest decided to distribute a year-end dividend of (Y) 10 consistent with the revised forecast announced on January 27, 2012, with a payment date of June 4, 2012. Since Advantest paid an interim dividend of (Y) 5 on December 1, 2011, the total dividend per share for the fiscal year will be (Y) 15.

Advantest plans to distribute an interim dividend of (Y) 10 per share, a year-end dividend of (Y) 10 per share and annual total dividend of (Y) 20 per share since the uptrend of achievements is expected.

## 2. Management Policy

### (1) Advantest's Basic Management Policy

Advantest has established a corporate vision of "Technology Support on the Leading Edge", and its corporate mission of "Quest for the Essence". Guided by these principles, Advantest respects each of its stakeholders, strives to maintain harmony with society, and aims for the sustained development of the Company and the improvement of corporate value while contributing to the goal of a sustainable society.

### (2) Target Financial Index

Advantest applies the "AVA" (Advantest Value Added), a financial index incorporating the concept of EVA<sup>®</sup> (Economic Value Added) \*, as a significant management indicator, along with profit margin, ROE and cash flows. Specifically, Advantest will set the minimum return-on-investment ratio ("hurdle rate") for evaluating AVA at 8% and a mid-term target at 12% or more with an aim to further enhance corporate value and shareholder value.

\*"EVA<sup>®</sup>" is a registered trademark of Stern Stewart & Co.

### (3) Mid-and-Long-Term Business Strategy and Issues to be addressed

While maintaining "Measurements" as our core competence in mid-and-long term, Advantest intends to improve its corporate value by establishing a management and financial structure that responds timely to changes in the global market, and by aiming to increase market share by introducing fine products that will inspire the market demands of the next generation. To achieve these objectives, Advantest intends to further strengthen its product development operations and improve production efficiency while strengthening its overseas operations and support system in the U.S., Europe and Asia.

In FY2012, the first year of its new corporate initiative, ACT2014, the Advantest Group will commence company-wide activities targeting the mid-term goals set under the initiative:

- Revenues of (Y) 250.0 billion
- Over 20.0% operating margin
- Over 50.0% total market share of semiconductor test systems and test handlers

Starting in the semiconductor test equipment market, where the company's core competence lies, Advantest will leverage the synergies realized by the full integration of the former Verigy's assets and resources to expand its market share and the scope of its operations. In parallel, the company will aggressively develop the non-semiconductor businesses that are its future growth platform, while ceaselessly seeking to boost profitability and corporate value.

(6) Notes on Preconditions to Going Concerns: None

(7) Notes to the Consolidated Financial Statements

(Note 1) Accounting Principles, Procedures and the Presentation of the Consolidated Financial Statements

(a) Terminology, Form and Method of Preparation of the Consolidated Financial Statements

Advantest Corporation (or the “Company”) and its consolidated subsidiaries (collectively “Advantest”) prepare the consolidated financial statements in accordance with generally accepted accounting principle in the United States of America (“U.S. GAAP”). U.S. GAAP is codified in the Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”), which is the source of authoritative accounting principles recognized by the FASB to be applied by nongovernmental entities. Advantest Corporation and its consolidated subsidiaries prepare their unconsolidated financial statements in accordance with accounting principles generally accepted in the country of their domicile. Certain adjustments and reclassifications have been incorporated in the accompanying non-consolidated financial statements to present them in conformity with U.S.GAAP.

(b) Preparation of Consolidated Financial Statements and Registration with the U.S. Securities and Exchange Commission

Advantest Corporation became listed on the New York Stock Exchange on September 17, 2001 (local time) by means of an issuance of American Depository Shares, and has been filing a Form 20-F (equivalent to the Annual Securities Report in Japan) with the U.S. Securities and Exchange Commission since FY2001. Advantest prepares the consolidated financial statements in its Form 20-F in accordance with U.S. GAAP.

(c) Principles of Consolidation

Advantest’s consolidated financial statements include financial statements of the Company and its subsidiaries, all of which are wholly-owned. All significant intercompany balances and transactions have been eliminated in consolidation.

(Note 2) Significant Accounting Policies

(Accounting Changes)

On April 1, 2011, the Company and its domestic subsidiaries elected to change the method of depreciating fixed assets from the fixed-percentage-on-declining base application to the straight line method.

The Company analyzed the sales mixture of memory and non-memory business to evaluate the future production requirements and pattern of benefit from utilizing its fixed assets. Based on this analysis, Advantest and its domestic subsidiaries believe that the straight line method of depreciation is preferable as it better reflects the pattern of consumption of the future benefits to be derived from those assets being depreciated and provides a better matching of costs and revenues over the assets’ estimated useful lives, in light of product life cycles and current change in product mix to expand non-memory business. In accordance with ASC250 “Accounting Changes and Error corrections”, this change in depreciation method represents a change in accounting estimate effected by a change in accounting principle.

Accordingly, the effects of the change are accounted for prospectively beginning with the period of change and prior period results have not been restated. The change in depreciation method reduced depreciation expense and resulted in decreases in loss before income taxes and equity in earnings of affiliated company and net loss by (Y) 560 million and (Y) 560 million, respectively, for year ended March 31, 2012. Also the per share effect was (Y) 3.23, respectively, for year ended March 31, 2012.

In October 2009, the FASB amended the accounting guidance for revenue recognition under multiple-deliverable arrangements. The guidance modifies the criteria for separating deliverables and allocating consideration in multiple-deliverable arrangements. The allocation of revenue is based on estimated selling price if neither vendor-specific objective evidence nor third-party evidence of selling price is available. The guidance was adopted by the Company and its subsidiaries (collectively, “Advantest”) in the first quarter 2011. The adoption of the guidance did not have a significant impact on its consolidated results of operations and financial condition.

In October 2009, the FASB amended accounting guidance for software revenue recognition. This guidance changes the accounting model for revenue arrangements that include both tangible products and software elements. It provides guidance on how to determine which software, if any, relating to the tangible product would be excluded from the scope of the software revenue guidance. The guidance was adopted by Advantest in the first quarter 2011. The adoption of the guidance did not have a significant impact on its consolidated results of operations and financial condition.

There are no other changes pertaining to accounting policies other than as mentioned above from fiscal year 2010 Annual report which was submitted on June 24, 2011.

(Note 3) Reclassifications

Certain reclassifications have been made to the prior years’ consolidated financial statements to conform with the presentation used for the year ended March 31, 2012.

## (Notes)

- Adjustments to operating income (loss) in Corporate principally represent corporate general and administrative expenses and research and development expenses related to fundamental research activities that are not allocated to operating segments.
- Advantest uses the operating income (loss) before stock option compensation expense for management's analysis of business segment results.
- Additions to long-lived assets included in Corporate consist of purchases of software and fixed assets for general corporate use.
- Total assets included in Corporate consist of cash and cash equivalents, assets for general corporate use and assets used for fundamental research activities, which are not allocated to reportable segments.
